ALLERGEN INFORMATION: the table indicates the allergen ingredients of the meals. Those that are marked by a '?' may contain allergen ingredients like soylecitin. Certain scientific researches suggest that since soylecitin contains very little protein, and the ingredients themselves also represent a minor quantity, therefore the allergen reaction is negligible, however the risk of the reaction yet requires further researches. Whilst Don Pepe restaurants take due care preparing our meals and provide thorough and correct information about the allergen ingredients in the ALLERGEN INFORMATION TABLE, the 100% protection can not be guaranteed against, that further cross contamination of additional allergens has not occured during the course of pre-manufacturing and food processing of our ingredients that we use for preparing our meals, therefore we emphasize that our meals may contain traces of additional allergens in addition to allergens marked as ingredients.
